Education

Master Degree in Software Engineering

Politecnico Di Torino

October 2022 - Present

I'm attending the Computer Science Master Degree in Software Engineering with a particular focus on Embedded Systems. I attended "Computer Architecture" and "System and Device Programming" courses and now I'm attending a course about Embedded Operating Systems. I also have knowledge about compilers and how they work in deep. Moreover, I'm very into the Linux operating system and willing to improve my actual knowledge about it.

For the "Computer Architecture" course I made a project, specifically a porting of the Zephyr Operating System for the board ST SPC58 with a PowerPC Core.

Bachelor Degree in Computer Engineering

Politecnico Di Torino

October 2018 - March 2022

Work Experience

Frontend Developer

Zero11 S.R.L

October 2021 - October 2022

In my experience at Zero11 I improved my skills on building web pages, especially on the frontend. I've worked with HTML and CSS and I've also learnt template languages like Freemarker and XSLT as well as frameworks like React and Angular. Moreover, I've learnt how to build cross platform mobile applications with React Native.
